# 造物起异包装设计

Zaowu Qiyi Packaging Design — zcool.com.cn/u/ZNTI2Mjc5ODA=

*A super-symbol-led packaging studio: one repeatable mark, one dominant hue plus a single accent, reused verbatim across every SKU in a family.*

## 1 Visual DNA

**Super-symbol-led** **One-hue-plus-accent** **Bilingual** **CGI-staged**
**Category-adaptive** **Systemic, not one-off**

Confident, commercial, symbol-first packaging design that moves between a ceremonial/heritage register and a playful/contemporary one depending on category — while keeping one constant method underneath. Full evidence: `PERSONAL_DESIGN_SYSTEM.md`.

## 2 Portfolio Evidence

10 sampled cover images, reused from the prior Personal Design System demo (Phase 1–2, 2026-08-21). Each is that work's cover shot only.

## 3 Color Language

One dominant hue family per brand, plus exactly one small saturated accent. **Swatches below are approximate visual reads from screenshots, not claimed production colors.**

## 4 Typography

### Large native mark + small Latin line

Bilingual pairing where Chinese leads at large scale, Latin transliteration sits small beneath.

`work_01 (摘要 / ZHAI YAO), work_03 (artevive / 文创芝)`

### Near-parity per-SKU naming

An alternative bilingual pattern where CN/EN sit closer to equal weight, used per-SKU.

`work_09`

## 5 Composition

GENERATED DIAGRAM — NOT A SOURCE IMAGE

Dark / dramatic staging

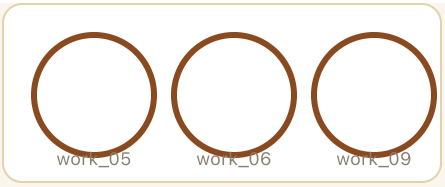

work_01, 03, 05, 06 — heritage / premium

Light / pastel staging

work_02, 04, 07, 08, 10 — soft-goods / wellness

## 6 Shape & Graphic Language

The circle/roundel recurs as a logo-container shape across otherwise unrelated brands (work_01, 05, 06, 09).

Generated diagram — abstracted shape, not a source image.

## 7 Imagery / Illustration

Photoreal CGI-rendered mockup is the default (7 of 10 works), with real environmental/lifestyle photography as an occasional deliberate exception (work_02, 08). Illustration, where present, is flat continuous linework (work_01) or a folk-art character style (work_09) — not painterly/textured rendering.

## 8 Signature Elements

### Hue + accent rule

HIGH

One dominant hue, one small saturated accent, never a flat multicolor palette.

`work_01,02,03,06,07`

### Repeated fixed mark

HIGH

One simplified symbol reused verbatim on every SKU/format.

`work_01,05,06,09`

### Bilingual pairing

HIGH

Chinese + Latin naming; hierarchy decided per brief.

`work_01,03,04,09`

### Category-conditioned staging

HIGH

Dark/dramatic for heritage-premium; light/pastel for soft-goods/wellness.

`01,03,05,06 / 02,04,08,10`

### CGI-render default

HIGH

Clean staged product render as the default; photography as exception.

`01,03,04,05,06,07,09`

### Ensemble/family composition

HIGH

Multi-SKU lines shown together, unified by the repeating mark.

`05,06,09`

### Form-as-symbol (optional)

HIGH, borderline

Package form itself echoes the brand concept.

`01,05,10 (10 partial)`

## 9 Do / Don't

### Do

- One dominant hue + one small accent
- One fixed mark reused everywhere
- Bilingual naming
- CGI staging by default
- Match backdrop to category
- Ensemble shots for multi-SKU lines

### Don't

- Two dominant colors on one item
- A unique mark per SKU
- Assume one language always leads
- Assume one illustration style fits every brand
- Assume a border/frame device — none found
- Invent exact colors/fonts

## 10 Agent Design Guide

### For a downstream generation agent

1. Choose the register (dark/heritage vs. light/wellness) based on the brief's category — don't default to one.
2. Pick one dominant hue; add exactly one small accent color.

3. Design one simplified graphic mark before designing any individual package; reuse it unchanged across every SKU.
4. Decide bilingual hierarchy (CN-leads vs. near-parity) per brief.
5. Default to a clean CGI-style render; use real photography only as a deliberate exception.
6. For multi-SKU briefs, compose a family/ensemble shot, not isolated single-item shots.

## 11 Evidence / Confidence

| RULE | WORK IDS | CONFIDENCE |
|---|---|---|
| Hue + accent | 01,02,03,06,07 | HIGH (5) |
| Repeated mark | 01,05,06,09 | HIGH (4) |
| Bilingual pairing | 01,03,04,09 | HIGH (4) |
| Category-conditioned staging | 01,03,05,06 / 02,04,08,10 | HIGH (8) |
| CGI-render default | 01,03,04,05,06,07,09 | HIGH (7) |
| Ensemble composition | 05,06,09 | HIGH (3) |
| Form-as-symbol | 01,05,10* | HIGH, borderline (*10 partial) |
